

Data Analyst – Entry Level

 Company: Fractal Analytics

 Location: Bengaluru, Karnataka, India

Eligibility:

- Batch: 2023 / 2024 / 2025 Passouts
- Branches: B.Tech/B.E. in Computer Science, IT, Data Science, Mathematics, Statistics, or related fields

 Position Type: Full-time | Entry-Level

Job Description:

Fractal Analytics is seeking enthusiastic and analytical Data Analysts to join our Insights & Data Science team. This role is ideal for fresh graduates who are passionate about solving complex problems using data-driven insights.

As a Data Analyst, you will:

- Interpret large volumes of data to identify trends, anomalies, and actionable insights
 - Collaborate with business stakeholders to understand analytical requirements
 - Use SQL, Python, R, or Excel to clean, process, and visualize data
 - Build dashboards using tools like Power BI or Tableau
 - Support senior data scientists in deploying models and analytical solutions
-

Skills Required:

- Strong analytical and problem-solving skills
 - Proficiency in MS Excel and basic SQL
 - Exposure to Python/R and data visualization tools (good to have)
 - Excellent communication and team collaboration abilities
-

Salary:

- Annual CTC: ₹6.0 – ₹8.5 LPA
 - Stipend (if internship prior to FTE): ₹20,000 – ₹25,000 per month (for a 3-6 month internship)
-

Why Join Us?

Fractal is one of the most respected analytics firms globally. We provide you with the opportunity to work on real-world problems using cutting-edge tools in AI and analytics.
